To Whom It May Concern

I would like to recommend Ms Chen as a Maths tutor.

Ms Chen has taught my thirteen year old daughter, India, for almost a year now during which time India's Maths has improved rapidly. India has quickly advanced through the sets at her school and, just as pleasing for me, has developed a real enthusiasm and confidence for maths.

Ms Chen is obviously highly qualified but is also an excellent teacher. The two don't always go together.

Ms Chen's lessons are structured and fun and she uses a variety of teaching aids and materials which keep the lessons interesting. Ms Chen is extremely personable and has connected very well with my daughter.

I have no hesitation in giving Ms Chen the highest recommendation possible.

If you have any questions please don't hesitate to call me.
